AFEEL

*Enabling children
to reach their full potential
in the heart of Africa*

I - The Academy

The Academy For English Education of Lubumbashi (AFEEL) is an English speaking affordable school for the English speaking community and also for those who want to educate their children in English even if their first language is not English.

The Institute is based in the city of Lubumbashi in the Democratic Republic of Congo. Lubumbashi is the second city of the DRC with an estimated population of 1.5 million people.

II - Some information on Lubumbashi

There is a growing English language community in Lubumbashi, consisting of both expatriate and Congolese families. While some families speak English as a first language, there are many who look for an English education.

III - Mission & Vision:

The Academy's Mission is

To offer an excellent *all round* education in accordance with a spirit emanating from the principles of love for our neighbour, affection for one's country, in full enjoyment of the joys and pleasures of youth within a useful environment of stimulating learning and development of character.

The Academy's Vision is

- To provide a sound general education of high standard for children from pre-school age through to University entrance.
- To enable the students to appreciate the cultural and scientific achievements of our times.
- To provide the students with an all round, excellent education, the Academy will offer a choice of subjects, which will qualify them for entry into universities anywhere in the world and for gainful employment.
- To provide students with a supportive learning environment which will enable every student to achieve his/her maximum potential, intellectually, physically, socially and emotionally.
- To develop an awareness and a mindset of service within the Academy in particular and the Congolese society and environment in general, thus becoming useful citizens of the Republic and of the world.

Outworking of Vision

The Students must be facilitated to develop and grow:

- *Intellectually* as they increase in their knowledge of the world as God has made it and given it for our care and dominion and as they are given skills enabling them to effectively continue in further studies and gainful employment.
- *Emotionally* as they mature in years and in their personalities and as they move from being young children to becoming young adults
- *Socially* as they learn to live in harmony with others in the school society, in preparation of living in the society at large developing sensitivities and consideration of the needs of others.
- *Physically* as they develop their physical proficiencies cultivating a sound body together with a sound mind.
